# HELP US FIND YOUR HOUSE IN AN EMERGENCY

The Hebron Fire Department is selling reflective 911 address signs. Our goal is to get the Hebron community well marked for the safety and well-being of all. Time is a critical factor for emergency services. Every minute lost to inadequately marked homes can make the difference between life or death, and damage or total destruction.

## **HELP US -----HELP YOU**

A Town Ordinance has been approved for the numbering of Hebron properties and can be found in the Town Ordinance Book, Subsection 174.1. The sign plates will be 6"X18" aluminum in green or blue reflective background with 4" white reflective numbers on both sides. The cost of the signs are \$15.

## **HVFD recommendations are as follows:**

1. Use a 4"x4" post, 6 foot steel stake or sufficiently extended mailbox post installed beside the driveway on the frontage of the property.
2. The post should be placed no more than 5 feet back from the edge of the road. The purpose of the sign is to be easily visible to approaching emergency responders.
3. The reflective sign can be attached either vertically or horizontally approximately 4 feet high in order to be above the snow bank line.

Reflective address forms are available at Hebron Fire Department, 44 Main St., and the Town Office Building, 15 Gilead St.
